PROFILE

Senior software engineer and contractor with 5+ years writing production code for web and mobile products used in Africa and the US. I design the architecture, write and review the code, and own delivery, then use AI-assisted development to **ship weeks of work in days** without cutting corners. I also build AI features (LLM assistants, RAG, agents) when a product needs them. Currently Team Lead at Discovery Vault Technology; remote contractor for US teams since 2022. Available for projects, retainers and team augmentation.

CORE SKILLS

Engineering	TypeScript, JavaScript, React.js, Next.js, Node.js, REST & GraphQL, HTML, CSS/SCSS, PWAs, testing, CI/CD
Mobile	React Native (iOS & Android), app store releases
AI speed	AI pair-programming and agentic coding tools, AI-generated tests and docs, rapid prototyping
AI features	LLM APIs, retrieval-augmented generation (RAG), AI agents & tool calling, vector search, streaming chat interfaces, Python
Leadership	Team leadership, frontend architecture, code review, mentoring, Agile delivery, client consulting

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Team Lead

Sep 2023 – Present

Discovery Vault Technology · Full-time, hybrid, Lagos

- Lead the engineering team delivering secure, scalable software, cloud platforms and APIs for organisations across West Africa and worldwide.
- Own frontend architecture, coding standards and code review, raising performance and release quality.
- Partner with product, design and backend teams to scope features, plan sprints and ship production-ready interfaces.

Stack: React.js, TypeScript, React Native

Senior Software Engineer (Contract)

Jul 2022 – Aug 2023

BreezeLearn · Remote, United States

- Built web and mobile applications across the BreezeGPT product family, including AI-powered products.
- Sole frontend engineer on BONNEE, a US clothing-swap app, owning delivery from first build through store releases.
- Worked asynchronously with a US product team: clear written scoping, regular demos and dependable delivery.

Stack: React.js, React Native, TypeScript

Frontend Developer

Jun 2021 – Jun 2022

Sterling Bank · Full-time, remote, Lagos

- Developed React and React Native interfaces for digital banking products used by customers across Nigeria.
- Worked with designers and stakeholders to improve consistency and engagement across digital channels.

Stack: React.js, React Native

Frontend Developer

Jan 2020 – May 2021

ITSkillsCenter · Full-time, on-site, Lagos

- Built responsive interfaces for client products and helped train junior developers in modern frontend practice.

Stack: JavaScript, HTML, CSS

SELECTED PROJECTS

Answir	AI investor-relations platform that answers investor questions instantly from public filings. answir.ai
Breezeflow	24/7 AI customer-support platform; built onboarding and sign-in flows. breezeflow.io
CozyIntro	Creator fan-engagement experience from the BreezeGPT family. cozyintro.breezegpt.io
BONNEE	Clothing-swap mobile app for the US market; sole frontend engineer (React Native). bonnee.co

Also delivered: RetinaLogik (VR vision testing), Omnibiz Retail (B2B retail app), Tremendoc (telemedicine), Collar Gig (freelance marketplace), Erider (logistics app). Client work with Soar Digital, AlphaCX and Paysync.
